Volume 24 Author and Subject Index

A

accountability, 367
achievement levels, 355
Albert, J. H., 281
Algina, J., 173
Alpert, A., 181
Alsawalmeh, Y. M., 163
Ankemann, R. D., 241
attitude measurement, 3, 33
automated scoring, 294
automated scoring systems, 310

B

Bayesian statistics, 151
Bennett, R. E., 294
Book Reviews, 181, 184, 187, 281, 284
Brennan, R. L., 339

C

Chang, H.-H., 241
Chen, S.-Y., 241
Cheng, P. E., 257
chi-square distribution, 50
Choi, S. W., 190
CIA-D, 190
circular equating, 195
Clauser, B. E., 310
coefficient alpha, 163
computer-based testing, 294
computerized adaptive testing, 241, 257
computerized assessment, 184
constrained optimization, 225
construct validity, 99
constructed response, 294, 310
contaminated-normal distribution, 267
correlation, 267
Computer Program Exchange, 190, 224, 256, 266
Cronbach's α, 163
cross-validity coefficient, 173
Curran, P. J., 181

D

Dayton, C. M., 266
De Ayala, R. J., 266
De Boeck, P., 151
DeMars, C., 224
dependent reliability coefficients, 163
detection and downweighting of outliers, 267
dichotomous items, 50
differential item functioning, 99
dimensionality, 99
DIMTEST, 82
Donoghue, J. R., 3
Drasgow, F., 184
DRAWICC, 224
Duncan, S. C., 181
Duncan, T. E., 181
dynamic Rasch model, 151

E

elementary symmetric functions, 65
Embretson, S. E., 284
equating criterion, 195
essential unidimensionality, 65, 82
ex-Gaussian distribution, 267
expert judgment, 82
exponential distribution, 267

F

Feldt, L. S., 163
Fisher information, 241, 257
full-information maximum likelihood estimation, 211

G

general linear hypothesis, 256
generalizability, 367
generalizability theory, 339
generalized graded unfolding model, 3
generalized latent variable model, 211

©2000 Sage Publications, Inc.

global information, 241
goodness-of-fit, 50
graded unfolding model, 3
growth curve, 181

H
Haase, R. F., 256
Hanson, B. A., 195
Hambleton, R. K., 291, 355
Harris, D. J., 195
Hershberger, S. L., 284
heuristic test assembly, 225
Hombo, C. M., 325
hyperbolic cosine model, 33

I
identifiability, 99
independent clusters basis, 99
integer programming, 139
intelligence tests, 151
internal-consistency reliability, 163
item analysis, 190
item bank design, 139
item difficulty, 82
item fit, 50
item information, 241
item information function, 224
item linking, 115
item response function, 224
item response theory, 3, 115, 139, 241, 257, 281, 325
item response theory
  item fit, 50
  multidimensionality, 82, 99, 115
  unidimensionality, 82

J
Jaeger, R. M., 355
joint maximum likelihood estimation, 33
Johnson, V. E., 281
Junker, B. W., 65

K
Keselman, H. J., 173
Kullback-Leibler information, 241, 257

L
large-scale assessment, 325
latent class analysis, 266
latent monotonicity, 65
latent variable modeling, 181
Laughlin, J. E., 3
learning, 151
least-squares regression, 173
Lee, Y.-W., 325
Li, F., 181
Li, Y. H., 115
Linn, R. L., 367
Liou, M., 257
Lissitz, R. W., 115
likelihood ratio statistic, 50
Likert scale, 3
linear programming, 139
local information, 241
lognormal distribution, 267
Luo, G., 33

M
manifest monotonicity, 65
marginal maximum likelihood, 3
mathematics, 294
MAT_HYP, 256
maximum likelihood, 257
McDonald, R. P., 99, 187
measurement error, 99
measurement theory, 284
Miller, M. D., 367
Mills, C., 355

mixed integer programming, 225
mixed-normal distribution, 267
monotone homogeneity, 65
Morley, M., 294
Moustaki, I., 211
multidimensional item response theory, 99, 115
multiple correlation, 173
Muraki, E., 325

N

National Assessment of Educational Progress, 325
Nering, M. L., 184
nonparametric item response models, 65
null hypothesis, 163

O

occasions, 339
Olson-Buchanan, J. B., 184
optimal test assembly, 139, 225
ordinal data modeling, 281
ordinal items, 211
Orlando, M., 50
outlier-prone, 267
outliers, 267

P

passing scores, 355
Pearson statistic, 50
performance assessment, 291, 294, 310, 325, 339, 355, 367
performance standards, 355
pivot items, 225
Plake, B. S., 355
prediction, 173
proportional odds model, 211

Q

Quardt, D., 294

R

random equating error, 195
Rasch model, 151
raters, 339
ratings, 310
Reckase, M. D., 187
Reese, L. M., 139
reliability, 339
restriction of range, 267
Roberts, J. S., 3

S

sample size, 173
Seraphine, A., 82
scoring, 310
set-based test items, 225
Sijtsma, K., 65
Sireci, S. G., 284
simulation study, 115
single-peaked function, 33
single-stimulus responses, 33
Spearman-Brown extrapolations, 163
standards, 355
statewide testing, 367
strict unidimensionality, 65
Strycker, L. A., 181
systematic equating error, 195

T

tasks, 339
test assembly, 139
test equating, 115, 195, 325
test linking, 325
test specifications, 139
test theory, 187
Thissen, D., 50
Thurstone scale, 3
trait estimation, 257

U
unfolding model, 3, 33
unidimensional scaling, 33
unidimensionality, 82

V
van der Linden, W. J., 139, 225
validation, 310
validity, 367
Veldkamp, B. P., 139
Verguts, T., 151

W
Wang, T., 195
Wickens, T. D., 281
Williams, R. H., 267

Y
YeoLCA2, 266

Z
Zimmerman, D. W., 267
